# New ACCA Quality Installation certificate program, powered by measureQuick<sup>®</sup>

ACCA is launching two new Quality Installation (QI) certificates in beta, powered by measureQuick<sup>®</sup>: **Verified Equipment Operation** and **Verified System Performance**.

## Prove It with Quality Installation Certificates

-  Verified HVAC equipment and systems that are more reliable, efficient and improve home comfort
-  System performance meets National Standards for Quality Installation
-  Highest quality of workmanship and expertise
-  Powered by 3rd-party verification through the measureQuick app

Powered by **measureQuick**<sup>®</sup>  
Connect. Perform. Prosper.

measureQuick is the only HVAC app that can effortlessly collect and analyze heating and cooling system performance using Bluetooth<sup>®</sup> tools. The app finds faults that are often overlooked and creates a Vitals Score and an easy-to-read report that summarizes existing conditions to the homeowner.

With measureQuick, your company can meet higher installation and performance standards, benchmark systems for future service, and increase revenue.

### QI: Verified Equipment Operation

### QI: Verified System Performance

## Requirements

Bluetooth connected tools — (or other)

measureQuick App with ACCA workflow

Documentation provided by measureQuick

Airflow

Refrigerant charge

On-rate combustion

Electrical

All requirements for Verified Equipment Operation

Plus:

#### Design

- Ventilation – per AHJ
- Manual J load calculation
- Manual S equipment selection
- AHRI matched system

#### Ducts

- Tight
- Balanced

## Installation Benefits

Confirmation:

**Installer** knows how the equipment is currently performing

**Manager** knows installation status: strengths and opportunities

**Customer** knows they got what they paid for, or didn't get, and why (ducts, mismatched equipment, line sets, etc.)

Confirms system operation

- **Design:** Basis for performance
- **Equipment:** Verified operation meets standard's requirements
- **Ducts:** Tightness confirmed (and air balancing, if applicable)

Based on industry-developed NATIONAL STANDARD for QUALITY INSTALLATION

Performance documented and benchmarked (useful for future maintenance)

Demonstrates highest professional level of expertise and workmanship

## measureQuick Benefits

Vitals Score and Report

Immediate Performance Data & 100's of System Faults Diagnostics

Testing the whole system — 9 parameters tested simultaneously from temperature split and static pressure

No other app tests airflow like measureQuick

Standardized analysis providing 3rd party verification on the job with the contractor

App benefits:

- Remote and streaming capabilities
- Works with top CRMs
- Direct data capture from a variety of sensors and manufacturers
- Automatic cloud data storage, including unlimited photos
- In-app education to support in-field assessment and performance

## Certificate Pricing

ACCA Member & QA Contractor	\$30 each (20 Gratis / year)
QA Contractor (non-member)	\$40 each (20 Gratis / year)
ACCA Member	\$40 each
All Other HVAC Professionals	\$50 each
